-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Applicant has provided the information of the CONTINUING DATA with a typographical error. The current application is a CIP of - - 09/844,746- - not "09/844,745" as provided by the applicant.

2. The drawing is objected to because the only figure should be labeled as - - Figure 1--.

3. The drawing is objected to because blank boxes in the figure should be labeled. For examples, box 6 should be labeled as - -control unit--, box 3 should be labeled as - - light source--.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said producing means" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2636

5. The claims are objected to because in claim 1, line 7 and in claim 2, line 6, the phrases "three-six" should be changed to - -three to six--.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fritzinger.

Regarding claims 1 and 2, Fritzinger discloses a traffic light system/method comprising three individual elements for producing a green signal (G), a yellow signal (Y), and a red signal (R), and control means 13 for controlling the elements, the control means being formed and operating so that the element producing the green signal first generates a permanent non-blinking green light and thereafter the same element producing the permanent green light generates a green light which flashes immediately before the yellow signal is produced to give drivers an additional period of time to decide whether or not to stop when the yellow signal appears (abstract, column 2, line 60- col. 3, line 30, col. 4, lines 15-35, col. 12, lines 40-57, col. 13, lines 20-43). Fritzinger does not disclose a time period of three to six seconds. However, it would have been obvious to have a time period of three to six seconds since it is not inventive to discover the optimum or workable ranges by routine experimentation.

Art Unit: 2636

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Walker, Safronow, Simon, and Nicholls disclose traffic control systems.
